Vision & Mission:

Our Vision:

We strive to become the leading consulting engineers and project managers when it comes to sustainability.

Our Mission is:

- To add value through innovative, professional, cost-effective and scientifically sound sustainable solutions.
- To apply scientific and engineering skills through our multidisciplinary resources to meet the needs and aspirations of our clients with due recognisance of environment, health and safety.
- To develop and continually improve our business strategies and policies aligned to our vision.

Company Description:

Pemahn Consulting Engineers and Project Managers (Pemahn) was founded and registered in December 2011. Pemahn operates as a private company from January 2013.

The directors of Pemahn have a combined working experience of 41 years. Their experience was gained while working with leading firms and institutions in the consulting, mining, government, parastatals and academic fields.

In addition, Pemahn has incorporated corporate consultants who have wide experience in the field of civil engineering in pursuit to position it as a multidisciplinary company.

Our services include feasibility studies, planning, design development, construction, maintenance and monitoring of civil and mining engineering projects. We also carry on the business of providing project management services in the fields of civil and mining and other related services. We offer services in conceptualisation, initiation, planning, execution, controlling and closing processes and ensure proper implementation of the ten (10) knowledge areas of project management.

Key Executive:

Thesele Mokoma Pr Eng Pr CPM, Dip, BSc Civil Eng, BEng (Hons) Transportation Eng, MSAICE

Thesele Mokoma is a Managing Director. Thesele has been involved in the field of Civil & Transportation Engineering and Project Management since 1997. His expertise include;

- Road Geometric, Pavement Investigation, Evaluation, Rehabilitation & Design,
- Stormwater Design, Control & Management,
- Bulk Earth Works – Platforms and Detention Ponds,
- Contract Documentation, Tendering & Construction Monitoring (Including labour methods),
- Contracts and Project Management,
- Training and Mentoring young professionals
- Autocad, Civil Designer & Civil Suite Design Software

Directors and Corporate**Consultants Affiliations:**
